

Lessons for Building Programs to Promote Postsecondary Success Among Opportunity Youth

Urban Institute Opportunity Works Implementation and Evaluation Findings

Theresa Anderson

July 31, 2017

Back on Track

- Three phases:
 - Enriched preparation
 - Postsecondary/career bridging
 - First-year support
- Framework originally documented in 2014
 - New version will be released soon
- Received a Social Innovation Fund grant for replication in seven locations
 - Boston, Hartford, New Orleans, Philadelphia, San Francisco, Santa Clara County, South King County (Seattle)

Research Methods

- Data sources
 - Quarterly calls with sites
 - Logic model development
 - Semi-annual convenings
 - **Two-day site visits (fall 2016)**
 - Interviews, focus groups, observations
- Developed detailed site summaries
- Synthesized information
- Used the original Back on Track model as a framework for evaluation

Focusing on Four Areas

- ✓ Moving partnerships to service delivery
- ✓ Building postsecondary bridging opportunities
- ✓ Targeting, recruitment, and retention
- ✓ Data and tracking

Moving Partnerships to Service Delivery

- Backbones: Often non-profit intermediaries, although also higher education institutions and workforce investment boards
- Backbones had formal contracts or MOUs with primary partners for service delivery
 - Also an array of secondary partners for supportive services, referral, political support, or financial support
- Some backbones selected partners through competitive bidding & others leveraged existing relationships
- Useful to have a postsecondary partner at the table

Building Postsecondary Bridging Opportunities

- Help OY develop an orientation toward college & a college identity
- Help students develop career & education plans
- Identify career pathways that will lead to family-sustaining wages, career growth, & satisfaction
- Offer college preparatory or college simulation classes
- Create supported dual enrollment opportunities
- Create warm transitions to college
- Provide continued support to students after they enroll
- Create earn-and-learn or other work experience opportunities

Examples of Postsecondary Bridging

- Philadelphia:
 - Problem: Gap in meaningful bridging from high school completion programs into postsecondary
 - Lacking college skills and confidence, navigation, retention support
 - Supplemental classes with 2 hours of English instruction and 2 hours of college readiness per week embedded in high school completion program
 - Navigation and coaching
 - College visits and exposure
 - College application and testing support
 - Warm transition to college
 - Tuition support for their first college experience

Examples of Postsecondary Bridging

- Boston:
 - Problem: Gap in the “door and navigation” within youth pathways in the city, especially youth ages 20-24
 - Connection Center
 - Caring adult staff members making meaningful connections with youth
 - Navigation to other needed supportive services
 - Links to postsecondary & training providers (reserved seats)
 - Two- and four-year colleges
 - Industry-based credential training programs (pharmacy technician, plumbing, carpentry, construction, culinary, banking, IT, etc.)
 - Apprenticeships leading to unionized employment

Staffing Considerations

- Staff are the primary financial investment
- Titles reflect roles:
 - “Advisor,” “advocate,” “coach,” “navigator,” “development,” “instructor,” “recruitment,” or “retention”
- Pairing with youth:
 - Staff paired directly with youth
 - Staff paired by needs
- “Caseloads” generally range from 20-32, but may vary within sites based on intensity of work with youth in different stages
- Some sites are more explicit than others in making staff reflective of & relatable to the youth they are serving

Targeting

- “Disconnected” youth, but the definition varies

Type of Disconnection	Description
High School	<ul style="list-style-type: none"> ▪ Dropped out of high school before receiving diploma ▪ May or may not be enrolled in a high school equivalency program or alternative high school
Postsecondary Pathway	<ul style="list-style-type: none"> ▪ Finished high school or GED, but has not connected to a postsecondary career pathway ▪ Does not have postsecondary career goals or aspirations ▪ Enrolled in a college or other postsecondary program but dropped out or stopped out before completing
Employment	<ul style="list-style-type: none"> ▪ Unemployed ▪ Underemployed ▪ Employed full-time, but with no opportunity for advancement and/or no clear career pathway
Other Challenges	<ul style="list-style-type: none"> ▪ Justice involved (e.g. on parole, arrested but not detained, in custody) ▪ Pregnant or parenting ▪ Homeless ▪ Emerging from the foster care system

Targeting

	Age Range	Race/Ethnicity	Education Completed	Prioritized Characteristics
Bos.	20-24	None specified	High school diploma or equivalent	None specified
Hart.	16-24	None specified	High school diploma or equivalent; small proportion without	Young men of color
NOLA	16-24	None specified	Track dependent: completed 2-3 sections of HiSET; 5-8 th -grade level on TABE; high school diploma or completed HiSET	None specified
Philly	16-21	None specified	On a good high school equivalency completion track	None specified
SF	17-24	Latino & African-American	Do not have a high school diploma or equivalency	Justice involved; majority men
SCC	16-24	None specified	Do not have a high school diploma or equivalency	Pregnant & parenting, homeless, foster care, justice involved
SKC	16-21	None specified	Completed 2 nd GED test or are 6-9 months from attaining high school diploma	None specified

Recruitment

- Recruitment from:
 - Embedded programs
 - Within high school completion or reengagement programs
 - Outreach or referrals through community agencies and partner programs
 - Including the justice system
 - Direct outreach to youth
 - Connection center, flyers, social media, ads, door-knocking, tabling
- Challenges
 - Need a strong enriched preparation pipeline for youth to be ready for postsecondary bridging
 - Need strong postsecondary bridging opportunities once students finish enriched preparation

Retention Strategies

- Relationships
 - Develop a relationship of mutual accountability
 - Spend time with youth as needed
 - Include family members in some support discussions
- Communication
 - Text or call youth daily, weekly, or twice per month
 - Respond to youth texts and calls quickly, even beyond the scheduled work day/week
 - Meet with youth at least once per week
- Reinforcement
 - Give celebrations and awards (e.g., incentive gift cards) at key milestones and the end of the program
 - Provide incentives based on youth behaviors rather than outcomes (e.g., attending classes)

Retention Strategies

- Expectations
 - Set attendance and participation standards and follow up when youth do not meet them
- Barrier Remediation
 - Provide assistance obtaining part-time employment that does not conflict with program activities or school
 - Refer to needed community resources to remediate barriers
 - Transport youth personally
 - Provide specialized support for pregnant and parenting, justice involved, homeless, and youth in foster care

Data and Tracking

- Many sites had existing data systems among their collective impact partners
- Data collection and usage is developing at all of the Opportunity Works sites, and there have been notable gains since Opportunity Works started
- 4 sites built or are in the process of building new data systems
- 6 of the 7 sites use or are building Efforts-to-Outcomes (ETO) or Salesforce systems

Unique Data Collection Strategies at Some Sites

- Common intake forms
- Regularly updating baseline indicators
- MOUs to bring in other data – e.g., from K-12 systems
- Supplemental tracking in Excel

Common Data Limitations

- Measuring participant gains
- Tracking trauma
- Standardizing measures of service receipt across partners
- Quality assurance to ensure complete & consistent data

Data Usage

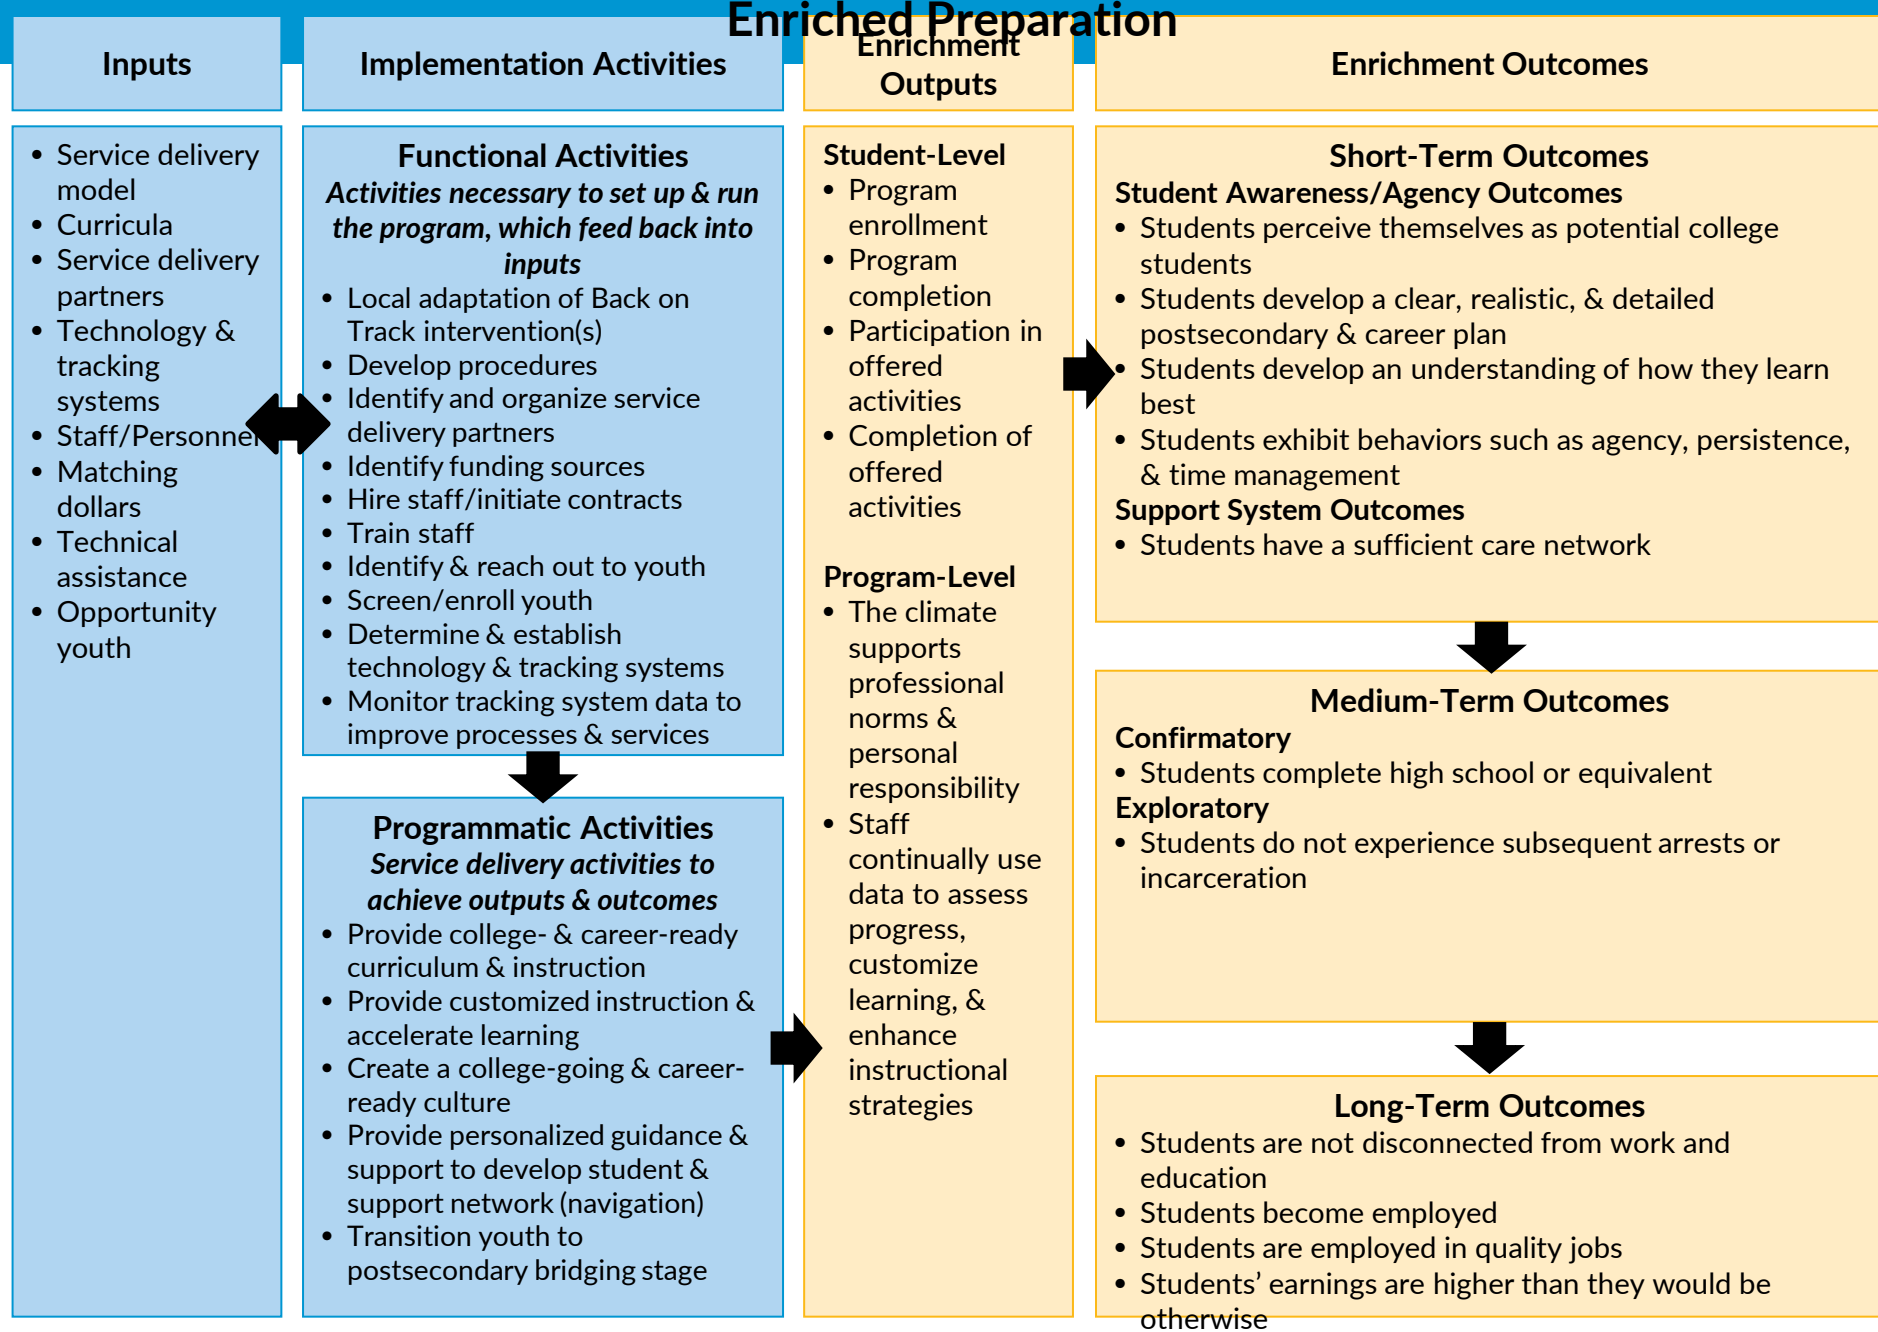

- There are varying levels of data sophistication among partners
- In New Orleans the backbone has given a lot of data technical assistance to partners
- At least 4 sites have monthly data-specific meetings with partners; others talk about data in monthly general meetings
- Sometimes it is hard to extract data in user-friendly formats
- Some systems were designed for compliance rather than case management or program improvement

Thank you!

Theresa Anderson

Enriched Preparation

Contextual factors: Local labor market, service infrastructure for youth, juvenile justice system, availability of adult and postsecondary education and training options, policies affecting youth (e.g., GED changes, Pell Grant availability)

Postsecondary/Career Bridging

Contextual factors: Local labor market, service infrastructure for youth, juvenile justice system, availability of adult and postsecondary education options, policies affecting youth (e.g., GED changes, Pell Grant availability)
