TANF **DATA** COLLABORATIVE

Data Sharing & Data Governance

ACTIONABLE INTELLIGENCE
FOR SOCIAL POLICY
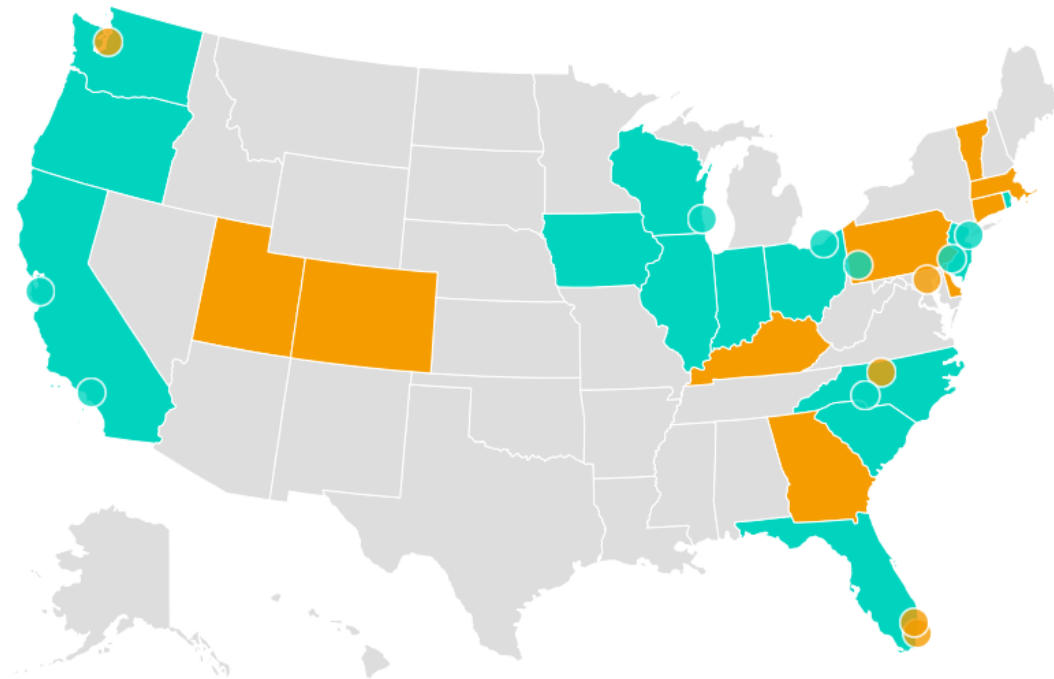

Who is AISP?

AISP: National Experts on Cross-Sector Data Sharing

We are:	We are not:
Data sharing coaches	A data holder or intermediary
Connectors, field builders, thought partners	A vendor or vendor recommender
Focused on ethical data use for program evaluation, resource allocation, policy change	Focused on academic research

AISP: National Experts on Cross-Sector Data Sharing

- ✓ Convene a professional network of local/state governments sharing data across sectors

- ✓ Offer training and technical assistance to help new state and locals do the same

- ✓ Advocate on behalf of data sharing at federal, state, and local level

- ✓ Support multi-site analysis

What is data governance & why does it matter?

# We <3 data governance and you should to!

What is it?

- ✓ **Roles & responsibilities**
- ✓ **Policies & procedures**
- ✓ **Rules of the road**
- ✓ **A way to get people together**

Why have it?

- ✓ **Builds & institutionalizes trust**
- ✓ **Facilitates shared decision-making**
- ✓ **Ensures ethical data use**
- ✓ **Keeps projects rolling**

TDC Framework

Data governance is essential throughout the project lifecycle!

How can AISP & TDC help?

Data Governance: Tools & Tips for Getting Started

Data Governance Throughout the Project Lifecycle	
Governance Activities	**Who should be at the table?**
Prioritizing shared inquiry questions	Executive leadership, all data partners
Agreeing on a data model, assessing data availability and quality	Agency staff from all data partners, including analysts and those closer to data collection and data management
Ensuring ethical data use	Executive leadership, all data partners. May also involve external ethics review and/or IRB.
Developing and executing legal agreements	Legal counsel from each data partner agency, privacy officer, CDO / CIO
Monitoring data security	IT support, data managers, privacy officer(s)
Analysis and interpretation	Agency staff conducting analysis consulting with analysts from partner agencies and university partners, as needed
Translation and use	Data partners, analysts, stakeholders

Data governance is one piece of the data sharing puzzle

✓ **Partnership and trust**

✓ **Data governance**

✓ **Legal and data security**

✓ **Data management & analytic infrastructure**

✓ **Economic and political stability**
